PROFESSIONAL SUMMARY

Frontend Developer | Computer & Intelligent Systems and Computer Engineering Student

Analytical Computer & Intelligent Systems Engineering student with hands-on skills in Frontend technologies (HTML5, CSS3, JavaScript) and backend logic using Java and Python. Dedicated to building responsive web interfaces, crafting clean OOP code, and delivering end-to-end software solutions.

Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+)
 - **Backend & OOP:** Java, Python
 - **Tools & IDEs:** VS Code, Git/GitHub, NetBeans
 - **Computer Skills:** (Word, Excel, PowerPoint).
 - **Soft Skills:** Problem-Solving, Teamwork, Communication, Time ManagementTeamwork.
-

Education

Bachelor of Intelligent Systems & Computer Engineering | Al-Aqsa University

Gaza, Palestine (2025 – Expected 2029)

High School Diploma | Al-Karmel High School

Gaza, Palestine (2023 – 2025)

Projects

Koala Design Website | *Front-End Web Project*

- **Technologies:** HTML5, CSS3 (Flexbox & Grid, Animations), JavaScript, VS Code
- Designed and built a responsive layout for a design showcase platform with a modern, clean UI.
- Implemented custom CSS styles and smooth animations to enhance visual appeal and user interaction.
- Structured clean, semantic HTML code ensuring cross-browser performance and mobile responsiveness.

To-Do List App | *Front-End Web Project*

- **Technologies:** HTML5, CSS3, JavaScript, VS Code, Git & GitHub
- Developed and published a dynamic task management web application enabling users to add, complete, and delete daily tasks efficiently with local storage support.
- Implemented interactive DOM manipulation and event handling using JavaScript to ensure a seamless and responsive user experience.
- Structured clean, semantic HTML and styled modern CSS layouts to maintain a clean UI and smooth interactions across devices.

(Weather Web App) | *Front-End Web Project*

- **Technologies:** HTML5, CSS3, JavaScript (API Integration, Chart.js), VS Code
- Designed and built a dynamic weather web application featuring interactive forecast charts and multi-language support to deliver real-time meteorological data.
- Integrated asynchronous API calls to fetch live weather information and utilized Chart.js to visualize temperature and forecast trends dynamically.
- Crafted a responsive, modern UI with custom styles and smooth animations to ensure optimal performance and usability across all screen sizes.

Certifications

- Java Certification **(2025)**.
- Foundations of Prompt Engineering - **AWS Training (2026)**.
- featuring sessions on LinkedIn & CV Development, Git & GitHub, Artificial Intelligence, and Student Clubs & Activities – **NAWRAS EDU (2026)**.

Languages

- **Arabic:** Native
- **English:** Upper-Intermediate / Very Good
